CAREER SUMMARY

Forward-thinking BCA final-year student specializing in AI Automation, Agentic Workflows, and Full-Stack Development. Hands-on experience engineering production-ready n8n workflows, API integrations, and scalable web architectures. Proven track record of optimizing workflow efficiency and system real-time capabilities in fast-paced development environments.

TECHNICAL SKILLS

AI & Automation: n8n, Agentic Workflows, LLM APIs (**OpenAI**), Prompt Engineering, API Integration & JSON Parsing

Backend & Databases: Node.js, Express.js, MongoDB, REST APIs, WebSockets

Frontend & Languages: React.js, JavaScript (ES6+), Python, Tailwind CSS, HTML5/CSS3

Tools & Platforms: Postman, Git, GitHub, VS Code

Soft Skills: Communication, Problem Solving, Team Collaboration, Adaptability, Quick Learning

INTERNSHIP EXPERIENCE

FULL STACK DEVELOPER INTERN | LABMENTIX | REMOTE

SEP 2025 - MARCH 2026

- **Engineered and scaled** full-stack web applications utilizing the MERN stack (React.js, Node.js, MongoDB), optimizing server response times and database queries.
- Integrated 4 third-party APIs via **n8n**, saving **10+ hours** of manual processing time per week.
- Resolved critical bugs across frontend and backend layers to maintain a **99% application uptime**.

WEB DEVELOPER INTERN | BHARAT ECONOMIC FORUM | REMOTE

JUL 2025 - SEP 2025

- **Developed high-performance, responsive UI components** using React.js and Tailwind CSS, strictly aligning production code with modern UI/UX design specifications.
- **Accelerated frontend rendering performance** by refactoring redundant components and establishing clean, standardized technical documentation for future developer onboarding.
- Maintained clean documentation and tracked project progress using agile collaborative tools.

PROJECTS

AI-Driven Enterprise Automation Workflow

- Designed complex automation pipelines using **n8n** to eliminate repetitive business processes and scale efficiency.
- Integrated **REST APIs** and handled complex **JSON** structures with conditional routing logic and webhooks.
- Engineered robust error-handling mechanisms within workflows to ensure **99.9% uptime** and continuous sync.

Autonomous AI Email Triggers & Lead Processing System

- Developed an intelligent **n8n** automation workflow utilizing **LLM APIs** to monitor incoming webhooks and categorize intent.
- Implemented **prompt engineering** layers to parse unstructured email data into clean **JSON objects**.
- Orchestrated automated, context-aware responses and immediate backend data syncing, cutting manual response times to seconds.

CureAsap – Real-Time Emergency Rescue System (*Team Project*)

- Architected a geo-fenced emergency dashboard broadcasting rescue alerts to healthcare facilities within a **5 km** zone.
- Implemented **WebSockets** for sub-second (**< 500 ms**) live data synchronization between users, drivers, and hospitals.
- Designed a multi-tier interface managing real-time bed inventory, medical logs, driver dispatch, and video verification.

EDUCATION

Bachelor's of Computer Application

2023 – 2026

Dr. Bhimrao Ambedkar University – Agra, UP

CERTIFICATES AND ACHIEVEMENTS

- **Web Development Bootcamp** | Hitesh Choudhary via Udemy (2025)
- **Mastering Generative AI and ChatGPT** | GeeksforGeeks (2025)
- **Python Development** | Udemy (2025)
- **Technical Excellence:** Commended during frontend internship for diagnosing and resolving 20+ critical UI bugs.
- **Workflow Optimization:** Successfully automated manual business processes by architecting custom n8n pipelines, drastically reducing manual data entry overhead
- **Automation Success:** Successfully engineered and deployed independent AI workflows using **n8n** to eliminate manual enterprise redundancies.
